

ABOUT ME

Final-year International Finance student with hands-on experience in data analytics, financial risk modelling, market research and product development. Experienced in applying Python, SQL and Excel to financial data, while developing practical exposure to banking products, customer-oriented initiatives and cross-functional projects. Interested in applying data-driven and business thinking to build better products, processes and customer experiences in financial services.

EDUCATION

Foreign Trade University - International Finance

2023 - 2027

CGPA: 3.24 (International Finance Management · Applied Technology in Finance & Banking)

EXPERIENCES

VPBank HO | Wholesale Banking Operations - Financial Market & Trade Finance Dep. **07/2026 - 09/2026**

- Supported wholesale banking operations across corporate deposits, Certificates of Deposit, import/export L/Cs and international guarantees, gaining exposure to financial products and transaction workflows.
- Worked across Treasury and Trade Finance processes, ensuring accuracy across transaction workflows and developing practical understanding of banking operations, process controls and operational risk.
- Handled transaction documentation and internal processing workflows, gaining exposure to operational controls and regulatory-driven processes in wholesale banking.

U2U Foundation | Business Development Intern

11/2024 - 04/2025

- Conducted market research and competitive benchmarking across 20+ fintech products, analyzing product positioning, pricing and business models.
- Built and maintained a 30+ partner database and supported 3 media partner onboardings, translating market insights into partnership opportunities.

PROJECT

Kaggle Competition - Home Credit Credit Risk Model Stability | Credit Risk Modelling Project

- Processed ~20M raw credit-risk records, loading data into PostgreSQL and performing data validation, EDA and variable analysis using Python and SQL.
- Performed feature transformation and variable analysis, including binning, WoE/IV analysis, variable transformation and cross-variable/interaction analysis.
- Used logistic regression and tree-based models with AUC, Gini and F1-score to assess variable predictive power and support feature selection.

Vietnam Banking Sector Analysis | 27 Listed Banks in 2020-2024 | Data Analysis Project

- Analyzed financial statements and operating indicators of 27 listed Vietnamese banks, including CASA, LDR, NPL and LLCR, using Excel.
- Compared differences in bank scale, liquidity and asset quality, connecting financial indicators with broader macroeconomic conditions.

EXTRACURRICULAR ACTIVITIES

TEC Go by TEC FTU – Lead of Product & Communications

11/2024 - 11/2025

- Co-designed and launched a national fintech talent-development initiative spanning workshops, networking, learning activities and a competition.
- Led a 15-member team and coordinated a broader 30-member cross-functional initiative across program development, research, communications, partnerships and operations.
- Reached 300+ competition participants and collaborated with 50+ ecosystem partners, including Dragon Capital and Sui Foundation.

SKILLS

Tools: Python (pandas, NumPy, scikit-learn, Polars, Matplotlib, Seaborn); SQL; Excel; VBA

Techniques: Data Processing; EDA; Feature Engineering; Statistical Analysis; Machine Learning; Financial Data Analysis

Finance & Banking: International Financial Market Products; Treasury Operations; Trade Finance Operations ; Credit Risk

Languages: Vietnamese (Native); English (Fluent, IELTS 8.0); Chinese (Elementary)

Certifications & Achievements: Deloitte Tax Challenge 2027 – Top 16; Credit Risk Modeling in Python – DataCamp
